Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 1 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 1/10 + 59/100 = **10** /100 + 59/100 = **69** /100
2. 85/100 + 1/10 = 85/100 + **10** /100 = **95** /100
3. 8/10 + 19/100 = **80** /100 + 19/100 = **99** /100
4. 6/100 + 6/10 = 6/100 + **60** /100 = **66** /100
5. 6/10 + 22/100 = **60** /100 + 22/100 = **82** /100
6. 12/100 + 8/10 = 12/100 + **80** /100 = **92** /100
7. 4/100 + 8/10 = 4/100 + **80** /100 = **84** /100
8. 13/100 + 2/10 = 13/100 + **20** /100 = **33** /100
9. 4/10 + 26/100 = **40** /100 + 26/100 = **66** /100
10. 74/100 + 2/10 = 74/100 + **20** /100 = **94** /100
11. 21/100 + 7/10 = 21/100 + **70** /100 = **91** /100
12. 6/10 + 38/100 = **60** /100 + 38/100 = **98** /100
