Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 10 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 43/100 + 3/10 = 43/100 + **30** /100 = **73** /100
2. 53/100 + 1/10 = 53/100 + **10** /100 = **63** /100
3. 8/10 + 3/100 = **80** /100 + 3/100 = **83** /100
4. 7/10 + 5/100 = **70** /100 + 5/100 = **75** /100
5. 24/100 + 6/10 = 24/100 + **60** /100 = **84** /100
6. 17/100 + 8/10 = 17/100 + **80** /100 = **97** /100
7. 11/100 + 8/10 = 11/100 + **80** /100 = **91** /100
8. 88/100 + 1/10 = 88/100 + **10** /100 = **98** /100
9. 4/10 + 19/100 = **40** /100 + 19/100 = **59** /100
10. 6/10 + 17/100 = **60** /100 + 17/100 = **77** /100
11. 5/100 + 6/10 = 5/100 + **60** /100 = **65** /100
12. 23/100 + 7/10 = 23/100 + **70** /100 = **93** /100
