Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 2 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 8/10 + 8/100 = **80** /100 + 8/100 = **88** /100
2. 7/10 + 27/100 = **70** /100 + 27/100 = **97** /100
3. 18/100 + 8/10 = 18/100 + **80** /100 = **98** /100
4. 7/10 + 6/100 = **70** /100 + 6/100 = **76** /100
5. 1/10 + 55/100 = **10** /100 + 55/100 = **65** /100
6. 33/100 + 6/10 = 33/100 + **60** /100 = **93** /100
7. 8/100 + 2/10 = 8/100 + **20** /100 = **28** /100
8. 45/100 + 5/10 = 45/100 + **50** /100 = **95** /100
9. 67/100 + 1/10 = 67/100 + **10** /100 = **77** /100
10. 6/10 + 35/100 = **60** /100 + 35/100 = **95** /100
11. 3/10 + 65/100 = **30** /100 + 65/100 = **95** /100
12. 7/10 + 13/100 = **70** /100 + 13/100 = **83** /100
