Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 3 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 14/100 + 4/10 = 14/100 + **40** /100 = **54** /100
2. 8/10 + 5/100 = **80** /100 + 5/100 = **85** /100
3. 16/100 + 7/10 = 16/100 + **70** /100 = **86** /100
4. 4/10 + 16/100 = **40** /100 + 16/100 = **56** /100
5. 24/100 + 7/10 = 24/100 + **70** /100 = **94** /100
6. 4/10 + 46/100 = **40** /100 + 46/100 = **86** /100
7. 3/10 + 43/100 = **30** /100 + 43/100 = **73** /100
8. 4/10 + 52/100 = **40** /100 + 52/100 = **92** /100
9. 6/100 + 8/10 = 6/100 + **80** /100 = **86** /100
10. 47/100 + 1/10 = 47/100 + **10** /100 = **57** /100
11. 25/100 + 5/10 = 25/100 + **50** /100 = **75** /100
12. 3/10 + 14/100 = **30** /100 + 14/100 = **44** /100
