Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 4 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 5/10 + 11/100 = **50** /100 + 11/100 = **61** /100
2. 4/10 + 59/100 = **40** /100 + 59/100 = **99** /100
3. 7/10 + 22/100 = **70** /100 + 22/100 = **92** /100
4. 45/100 + 1/10 = 45/100 + **10** /100 = **55** /100
5. 35/100 + 3/10 = 35/100 + **30** /100 = **65** /100
6. 13/100 + 8/10 = 13/100 + **80** /100 = **93** /100
7. 16/100 + 5/10 = 16/100 + **50** /100 = **66** /100
8. 1/10 + 53/100 = **10** /100 + 53/100 = **63** /100
9. 76/100 + 2/10 = 76/100 + **20** /100 = **96** /100
10. 25/100 + 6/10 = 25/100 + **60** /100 = **85** /100
11. 34/100 + 5/10 = 34/100 + **50** /100 = **84** /100
12. 46/100 + 4/10 = 46/100 + **40** /100 = **86** /100
