Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 5 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 5/10 + 15/100 = **50** /100 + 15/100 = **65** /100
2. 26/100 + 7/10 = 26/100 + **70** /100 = **96** /100
3. 15/100 + 8/10 = 15/100 + **80** /100 = **95** /100
4. 11/100 + 6/10 = 11/100 + **60** /100 = **71** /100
5. 5/10 + 24/100 = **50** /100 + 24/100 = **74** /100
6. 1/10 + 15/100 = **10** /100 + 15/100 = **25** /100
7. 38/100 + 1/10 = 38/100 + **10** /100 = **48** /100
8. 15/100 + 6/10 = 15/100 + **60** /100 = **75** /100
9. 5/10 + 49/100 = **50** /100 + 49/100 = **99** /100
10. 5/10 + 34/100 = **50** /100 + 34/100 = **84** /100
11. 13/100 + 7/10 = 13/100 + **70** /100 = **83** /100
12. 1/10 + 74/100 = **10** /100 + 74/100 = **84** /100
