Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 6 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 7/10 + 26/100 = **70** /100 + 26/100 = **96** /100
2. 6/10 + 36/100 = **60** /100 + 36/100 = **96** /100
3. 43/100 + 1/10 = 43/100 + **10** /100 = **53** /100
4. 29/100 + 2/10 = 29/100 + **20** /100 = **49** /100
5. 23/100 + 3/10 = 23/100 + **30** /100 = **53** /100
6. 37/100 + 6/10 = 37/100 + **60** /100 = **97** /100
7. 19/100 + 8/10 = 19/100 + **80** /100 = **99** /100
8. 1/10 + 82/100 = **10** /100 + 82/100 = **92** /100
9. 23/100 + 4/10 = 23/100 + **40** /100 = **63** /100
10. 5/10 + 46/100 = **50** /100 + 46/100 = **96** /100
11. 1/10 + 75/100 = **10** /100 + 75/100 = **85** /100
12. 3/10 + 12/100 = **30** /100 + 12/100 = **42** /100
