Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 7 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 8/10 + 11/100 = **80** /100 + 11/100 = **91** /100
2. 4/10 + 6/100 = **40** /100 + 6/100 = **46** /100
3. 3/10 + 49/100 = **30** /100 + 49/100 = **79** /100
4. 3/10 + 56/100 = **30** /100 + 56/100 = **86** /100
5. 6/10 + 29/100 = **60** /100 + 29/100 = **89** /100
6. 28/100 + 4/10 = 28/100 + **40** /100 = **68** /100
7. 8/10 + 7/100 = **80** /100 + 7/100 = **87** /100
8. 2/10 + 12/100 = **20** /100 + 12/100 = **32** /100
9. 6/10 + 3/100 = **60** /100 + 3/100 = **63** /100
10. 79/100 + 2/10 = 79/100 + **20** /100 = **99** /100
11. 1/100 + 5/10 = 1/100 + **50** /100 = **51** /100
12. 44/100 + 2/10 = 44/100 + **20** /100 = **64** /100
