Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 8 of 10

First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.

1. 3/10 + 26/100 = **30** /100 + 26/100 = **56** /100
2. 1/10 + 64/100 = **10** /100 + 64/100 = **74** /100
3. 19/100 + 7/10 = 19/100 + **70** /100 = **89** /100
4. 2/10 + 46/100 = **20** /100 + 46/100 = **66** /100
5. 48/100 + 3/10 = 48/100 + **30** /100 = **78** /100
6. 6/10 + 7/100 = **60** /100 + 7/100 = **67** /100
7. 13/100 + 5/10 = 13/100 + **50** /100 = **63** /100
8. 7/10 + 11/100 = **70** /100 + 11/100 = **81** /100
9. 8/100 + 8/10 = 8/100 + **80** /100 = **88** /100
10. 54/100 + 4/10 = 54/100 + **40** /100 = **94** /100
11. 6/10 + 21/100 = **60** /100 + 21/100 = **81** /100
12. 5/10 + 2/100 = **50** /100 + 2/100 = **52** /100
