# Adding Tenths and Hundredths - ANSWER KEY

Grade 4 | Adding a tenths fraction and a hundredths fraction by rewriting tenths as hundredths | Version 9 of 10

*First write the tenths as hundredths: 3/10 = 30/100. Then add the hundredths. Example: 3/10 + 4/100 = 30/100 + 4/100 = 34/100.*

1. 34/100 + 2/10 = 34/100 + **20** /100 = **54** /100
2. 3/10 + 29/100 = **30** /100 + 29/100 = **59** /100
3. 4/10 + 29/100 = **40** /100 + 29/100 = **69** /100
4. 22/100 + 5/10 = 22/100 + **50** /100 = **72** /100
5. 4/10 + 47/100 = **40** /100 + 47/100 = **87** /100
6. 6/10 + 31/100 = **60** /100 + 31/100 = **91** /100
7. 8/10 + 17/100 = **80** /100 + 17/100 = **97** /100
8. 9/100 + 7/10 = 9/100 + **70** /100 = **79** /100
9. 8/10 + 12/100 = **80** /100 + 12/100 = **92** /100
10. 17/100 + 3/10 = 17/100 + **30** /100 = **47** /100
11. 7/10 + 7/100 = **70** /100 + 7/100 = **77** /100
12. 2/10 + 69/100 = **20** /100 + 69/100 = **89** /100
