Classifying Triangles by Sides and Angles - ANSWER KEY

Grade 4 | Classifying triangles as acute, right or obtuse and as equilateral, isosceles or scalene | Version 1 of 10

Part A: Write acute, right or obtuse for each triangle. Part B: Write equilateral, isosceles or scalene. Use the side lengths in Part B.

Angles: acute = all small, right = one square corner, obtuse = one wide angle. Sides: equilateral = 3 equal, isosceles = 2 equal, scalene = none equal.

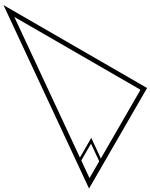

Part A: Classify by angles

1. 

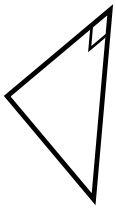

acute

2. 

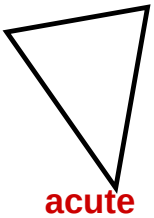

obtuse

3. 

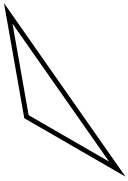

right

4. 

right

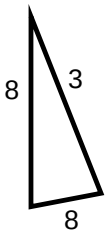

5. 

acute

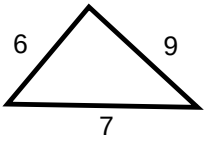

6. 

obtuse

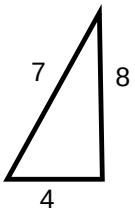

Part B: Classify by sides

7. 

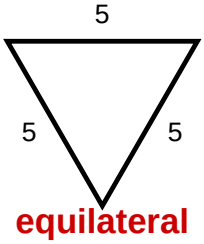

isosceles

8. 

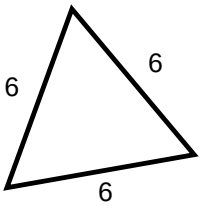

scalene

9. 

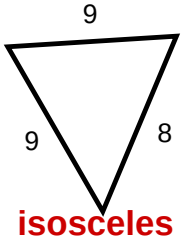

scalene

10. 

equilateral

11. 

equilateral

12. 

isosceles
