Classifying Triangles by Sides and Angles - ANSWER KEY

Grade 4 | Classifying triangles as acute, right or obtuse and as equilateral, isosceles or scalene | Version 10 of 10

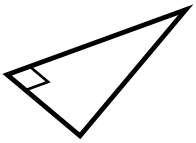

Part A: Write acute, right or obtuse for each triangle. Part B: Write equilateral, isosceles or scalene. Use the side lengths in Part B.

Angles: acute = all small, right = one square corner, obtuse = one wide angle. Sides: equilateral = 3 equal, isosceles = 2 equal, scalene = none equal.

Part A: Classify by angles

1. 

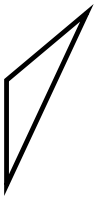

acute

2. 

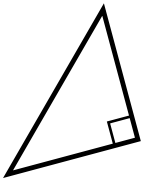

right

3. 

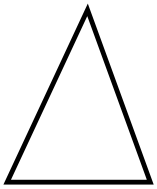

obtuse

4. 

obtuse

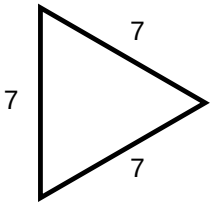

5. 

right

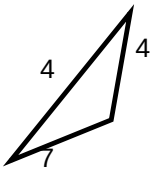

6. 

acute

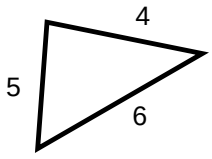

Part B: Classify by sides

7. 

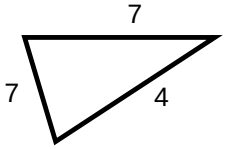

equilateral

8. 

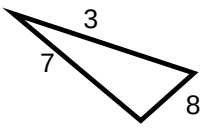

isosceles

9. 

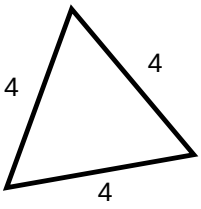

scalene

10. 

isosceles

11. 

scalene

12. 

equilateral
