# Whole Numbers as Fractions - ANSWER KEY

Grade 3 | Writing fractions such as 8/4 as whole numbers and whole numbers as fractions | Version 10 of 10

*A fraction equals a whole number when the top number is a multiple of the bottom number. Example: 6/3 = 2, because 6 thirds make 2 wholes. Any whole number over 1 equals itself: 5/1 = 5.*

**Part A: Write each fraction as a whole number.**

1. 24/3 = **8**
2. 3/3 = **1**
3. 72/8 = **9**
4. 8/8 = **1**
5. 21/3 = **7**
6. 6/2 = **3**
7. 15/3 = **5**
8. 16/4 = **4**
9. 24/8 = **3**
10. 8/1 = **8**

**Part B: Write each whole number as a fraction with the denominator shown.**

11. 6 (in thirds) = **18/3**
12. 6 (in fourths) = **24/4**
13. 1 (in halves) = **2/2**
14. 5 (in eighths) = **40/8**
15. 5 (in sixths) = **30/6**
16. 2 (in fourths) = **8/4**
17. 4 (in halves) = **8/2**
18. 1 (in sixths) = **6/6**
